

Donor Doc[®]

Version 3.3.0

Stay current.
Stay compliant.

Donor Doc software is an electronic donor health history solution that helps you streamline your blood center's donor history process. It's important to keep your software current. When you upgrade to the latest version of Donor Doc, you gain access to the latest features and enhancements to help your center increase efficiency, leverage technology and promote safety. Plus, you will remain compliant with your software maintenance agreement.

A Donor Doc v3.3.0 upgrade includes:

Donor and Staff Ease of Use Enhancements

- Easier for donors to enter birthdate on the welcome page of the Kiosk and/or Donor Doc Advance At-Home Questionnaire
- New option: 'ENTER' key acts like the 'NEXT' button while completing the questionnaire
- Question number and text are displayed when using additional information screens
- Donor's lifetime answers and comments to travel and medication questions are displayed on the questionnaire summary screen
- Displays and filters Travel Zone automatically based on the question setup
- Display of the Country/Region names listed on the Add Travel 'Search to Continue' page is lengthened for convenience
- Allows for use of touchscreen and signature pad to be active simultaneously so donors can choose how to sign

Administrative Enhancements

- Ability to print any selected question's additional information and comments, including all physical findings and interview-level comments, from donor questionnaire in PDF format
- Ability to link an abbreviated and full questionnaire to the same collection type
- Only allows those users with permissions to add manual deferrals
- Ability to have more than one table in table administration open at once without a timeout in one window causing all windows to close
- New functionality freezes or locks the column headers on the tables in Table Administration while in 'Edit' mode
- Qualified Donor Doc with Internet Explorer[®] 11 and Google[®] Chrome[®] 66
- Correction of known defects

Donor Doc Questionnaire

Donor Doc® software version highlights

Enhancements are cumulative, so when you upgrade, all of the features and enhancements in prior releases are included.

Key enhancements

Donor Doc v3.0.0 and v3.1.0

- Ability for the donor to initiate registration at the kiosk by entering identification information
- Donor Doc Advance – ability to complete questionnaires at home via the internet
- Features a web Table Administration application
- Support iOS and Android with an updated touch-friendly user interface and workflow
- Displays the donor's photograph throughout the system
- Ability to highlight modified and revised questions in the questionnaire to make it easier for donors to see changes or to call important topics to a donor's attention
- New Active Donor Queue which identifies Active Donors who have started the questionnaire or physical exam;
Donor Queue with donors who have registered but not started the questionnaire or exam

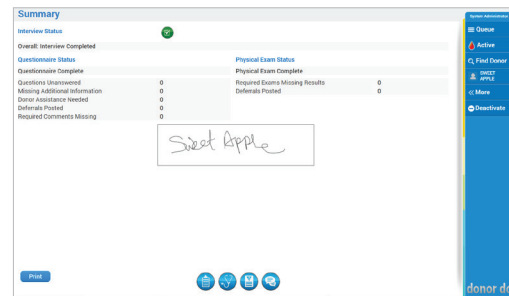

Additional new features included:

- Intuitive user interface
 - Quick and easy icon access to functions
 - Sort, filter and track donor status throughout cycle
 - Summary pages for efficient staff reviews
 - Range of options for question formatting
 - Built in controls to maintain compliance

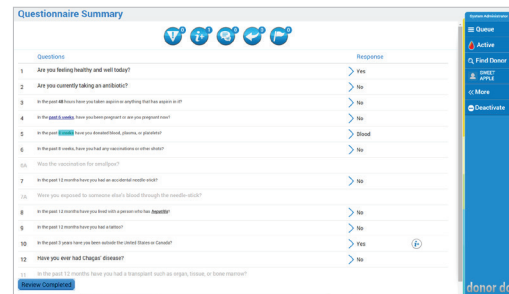

Donor Doc v3.2.0

- Ability to implement a secondary review of responses by licensed staff, supervisors and team leads
- Verify a donor's identity using digital signature capture and picture capabilities with the ability to format html text in the Kiosk Signature Page
- Ability to restrict the transfer of Questionnaire comments to SafeTrace® software
- Offers the ability to display only the last four digits of a donor's Social Security number
- Updated Mobile Exception page to prevent exception when querying for donor

Donor Doc Completed / Reviewed Questionnaire
